## ACKNOWLEDGEMENTS

---

First and foremost, I would like to thank my main teacher, Dr. Didier Grandgeorge, who opened me the door to wonderful world of homeopathy. The talented lecturer with charismatic personality, Didier passed an invisible ultradiluted energy that changed my understanding of life. Always available to help, he provided unique environment for learning and deep understanding of homeopathy, both theoretically and practically.

I'm deeply grateful to my dearests Dr. Jean-Louis Ode and Dr. Jacque Rey that allow me to spend many hours observing and learning the case taking management during homeopathic consultations.

Great appreciation to Prof. Yves Frances, the responsible of Homeopathy and Homeopathic Therapy's course, who gave me the opportunity to study homeopathy in Medical Faculty of Aix-Marseille University.

I would like to thank all my teachers during my study of homeopathy in Medical Faculty of Aix-Marseille University, Dr. Guy Rougier, Dr. Henri Carrée, Dr. Jean-Michel Alexis, Dr. Marie-Christine Vergnet-Courgeon, Dr. Gaël Gouiran, Dr. Bernard Poitevin, Dr. Riad Elias, Dr. Jean-François Perret, Dr. Luc Simeon, who shared their knowledge and have enthusiasm keeping the course alive and dynamic.

During my study I had an opportunity to participate in different homeopathic seminars where I had a chance to learn from different homeopaths worldwide: Dr. George Vithoukas, Dr. Farokh Master, Dr. Jorgos Kavouras, Dr. Michal Yakir, Dr. Dinesh Chauchan, Dr. Mahesh Gandhi, Dr. Jonathan Hardy, Dr. Resie Moonen, Dr. Deborah Collins, Kim Kalina. Thank you very much!

Finally, I would like to give a special attention to my family, to my husband Arthur and two my lovely children Daria and Artyom. Beside their support during my study, they were my "experimental mice" and gave me possibility to see *in life* the magic effect of homeopathy.

Finally and most importantly, my undying gratitude goes to Dr. Samuel Hahnemann, the finder of homeopathy. I would like to devote this work to him.

With love,  
Natalia
